📍 Jeddah, Saudi Arabia

## ABOUT ME

Computer Science student and Software Engineer passionate about building impactful software and AI-powered solutions. Experienced in full-stack web development, intelligent automation, prompt engineering, and modern AI technologies.

## EDUCATION

Arab open university | 2022-2026

### Bachelor of Science in Computer Science

Pursuing a Bachelor's degree in Computer Science with a strong foundation in software engineering, artificial intelligence, databases, and full-stack web development. Throughout my academic journey, I actively supported classmates by explaining technical concepts, assisting with assignments and projects, and helping solve programming challenges, which strengthened my communication, mentoring, and problem-solving skills. I was also an active member of the Entertainment Club, Computer Club, contributing to student activities, technical events, and collaborative initiatives while learning to work effectively under pressure and adapt to challenging situations.

## WORK EXPERIENCE

May 2026 – Present

### AI & Automation Workshop Participant – Mabda AI

- Completed an intensive 3-month practical workshop focused on AI, Generative AI, and automation.
- Developed skills in Prompt Engineering, Generative AI, and AI-assisted design and development.
- Built AI agents and automated workflows using n8n, webhooks, and AI models.
- Applied AI tools to develop websites, digital content, and business solutions.
- Collaborated on team-based projects and delivered technical presentations.

2024 – Present

### Freelance Software Developer

- Developed responsive web applications using modern technologies.
- Built AI-powered solutions with LLMs and Prompt Engineering.
- Integrated REST APIs and third-party services.
- Managed projects from planning and design to deployment.
- Designed professional profile materials and digital designs for companies.

Independent Projects

### AI Solutions Developer

- Designed AI assistants and intelligent automation workflows.
- Developed prompt engineering solutions for content generation.
- Built applications utilizing Large Language Models (LLMs).
- Explored AI Agents and Generative AI technologies.

---

## TECHNICAL SKILLS

- Languages: Java, JavaScript, Python, Go
- Frontend: HTML5, CSS3, React
- Backend: Node.js, Express.js, REST APIs
- Databases: MongoDB, SQL, Firebase
- AI: Prompt Engineering, LLMs, AI Agents n8n
- Tools: Git, GitHub, VS Code, Microsoft Office

---

## PROJECTS

2026

### Qurb – Graduation Project

AI-powered platform for Quran memorization circles with role-based dashboards, progress tracking, scheduling, and analytics.

Tech: React, Firebase, AI, Mobile

### Go Mission

Real-time multiplayer educational game designed for classrooms.

Tech: JavaScript, Firebase

### Marjan Al Sharq Security Services – Company Profile

Designed and developed a professional corporate profile that presents the company's identity, security services, vision, and capabilities. Created a clean, visually engaging layout with structured content, branding elements, and high-quality graphics to support business presentations and client acquisition.

### Global Eagle Travel

Developed a responsive travel and tourism website featuring both a public user interface and an administrative dashboard. The platform enables administrators to manage and update travel packages, destinations, and website content through Firebase Realtime Database, ensuring dynamic content without modifying the source code.

Tech: React, Firebase, AI, Mobile

---

## CERTIFICATIONS

- 1 Million Prompters
- Data Analysis with Gemini
- Afaq for AI – 3rd Cohort
- EYOUTH Learning Plan
- NewTech Hackathon – Data Analysis Track
- Programming Creativity Competition – First Place

---

## SOFT SKILLS

- Problem Solving
- Critical Thinking
- Communication
- Teamwork
- Leadership
- Time Management
- Adaptability
- Fast Learner
- Attention to Detail
- Analytical Thinking
- Decision Making
- Presentation Skills

---

## LANGUAGES

- Arabic – Native
- English – Advanced
- Turkish – basic
